DARE TO DREAM

## THE WORLD OF TOMORROW

We are founded on the belief that businesses can be socially and environmentally responsive without sacrificing the bottom line, and indeed may actually enhance it. We realize that our actions today impact the world of tomorrow, and—uniquely—as a private company, we have a special opportunity to demonstrate this commitment in our daily work.

## FOCUS ON OUR FUTURE

What kind of future are we creating—for our environment, our communities, our customers and people? We know that being an environmental steward is good business—it is a lean and survivable business model, less dependent on our world's natural resources. And investing in our communities enhances the quality of life today and tomorrow. We value people as people — what they can accomplish in their own lives and in their work for you.

## FASTER. BETTER. SMARTER.

Cascade Engineering is committed to ideas—to shaping them and giving them life. Our collaborative culture encourages creativity and ingenuity to solve complex challenges. An atmosphere that embraces a spirit of entrepreneurship makes it possible to create innovative, even renewable solutions that defy the odds. We have demonstrated this in our products and processes, our business design and employee programs and our community and environmental initiatives. And we push ourselves to become faster, better and smarter every single day.

## SYMBIOSIS

It's found everywhere from molecular science to international corporations. A cooperative relationship that benefits both parties, one where people embrace global challenges and differing points of view while enjoying new and interesting perspectives. It's diverse people within our organization working as a team, and our teams partnering with other companies in an atmosphere of openness and trust. Thus, beginning a virtuous cycle leading to creativity and discovery of more cost-effective solutions for our customers.

## MANUFACTURING SOLUTIONS

“I’m sorry, we can’t...” You won’t hear that at Cascade Engineering. Why? Because while we do manufacture products, we are in the business of selling solutions. We constantly search for better solutions for our customers’ challenges by utilizing the Cascade Engineering Lean Production System. By systematically and routinely reducing waste and improving productivity, we provide high-value, cost-effective solutions for our customers. In our lean environment, you can expect what you never dared to dream.
