SHAPING
IDEAS IN
PLASTICS™

BLANK CANVAS

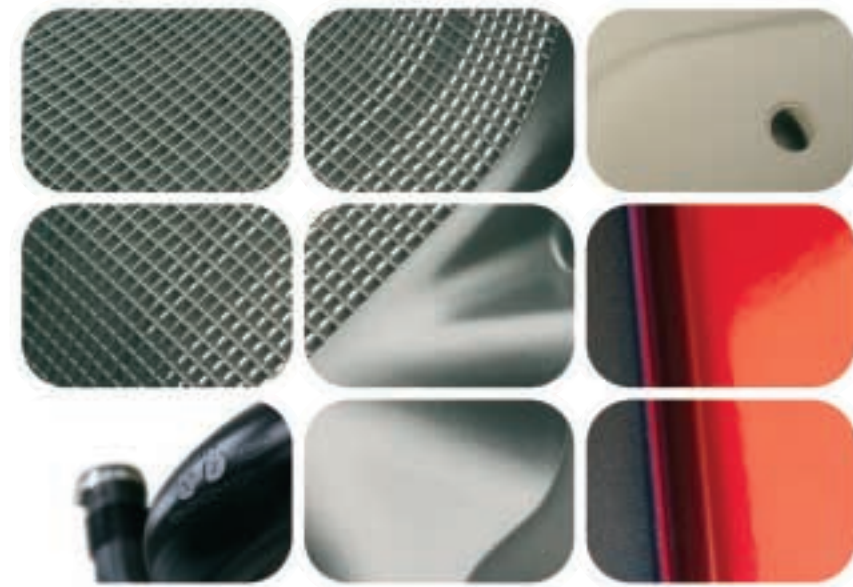

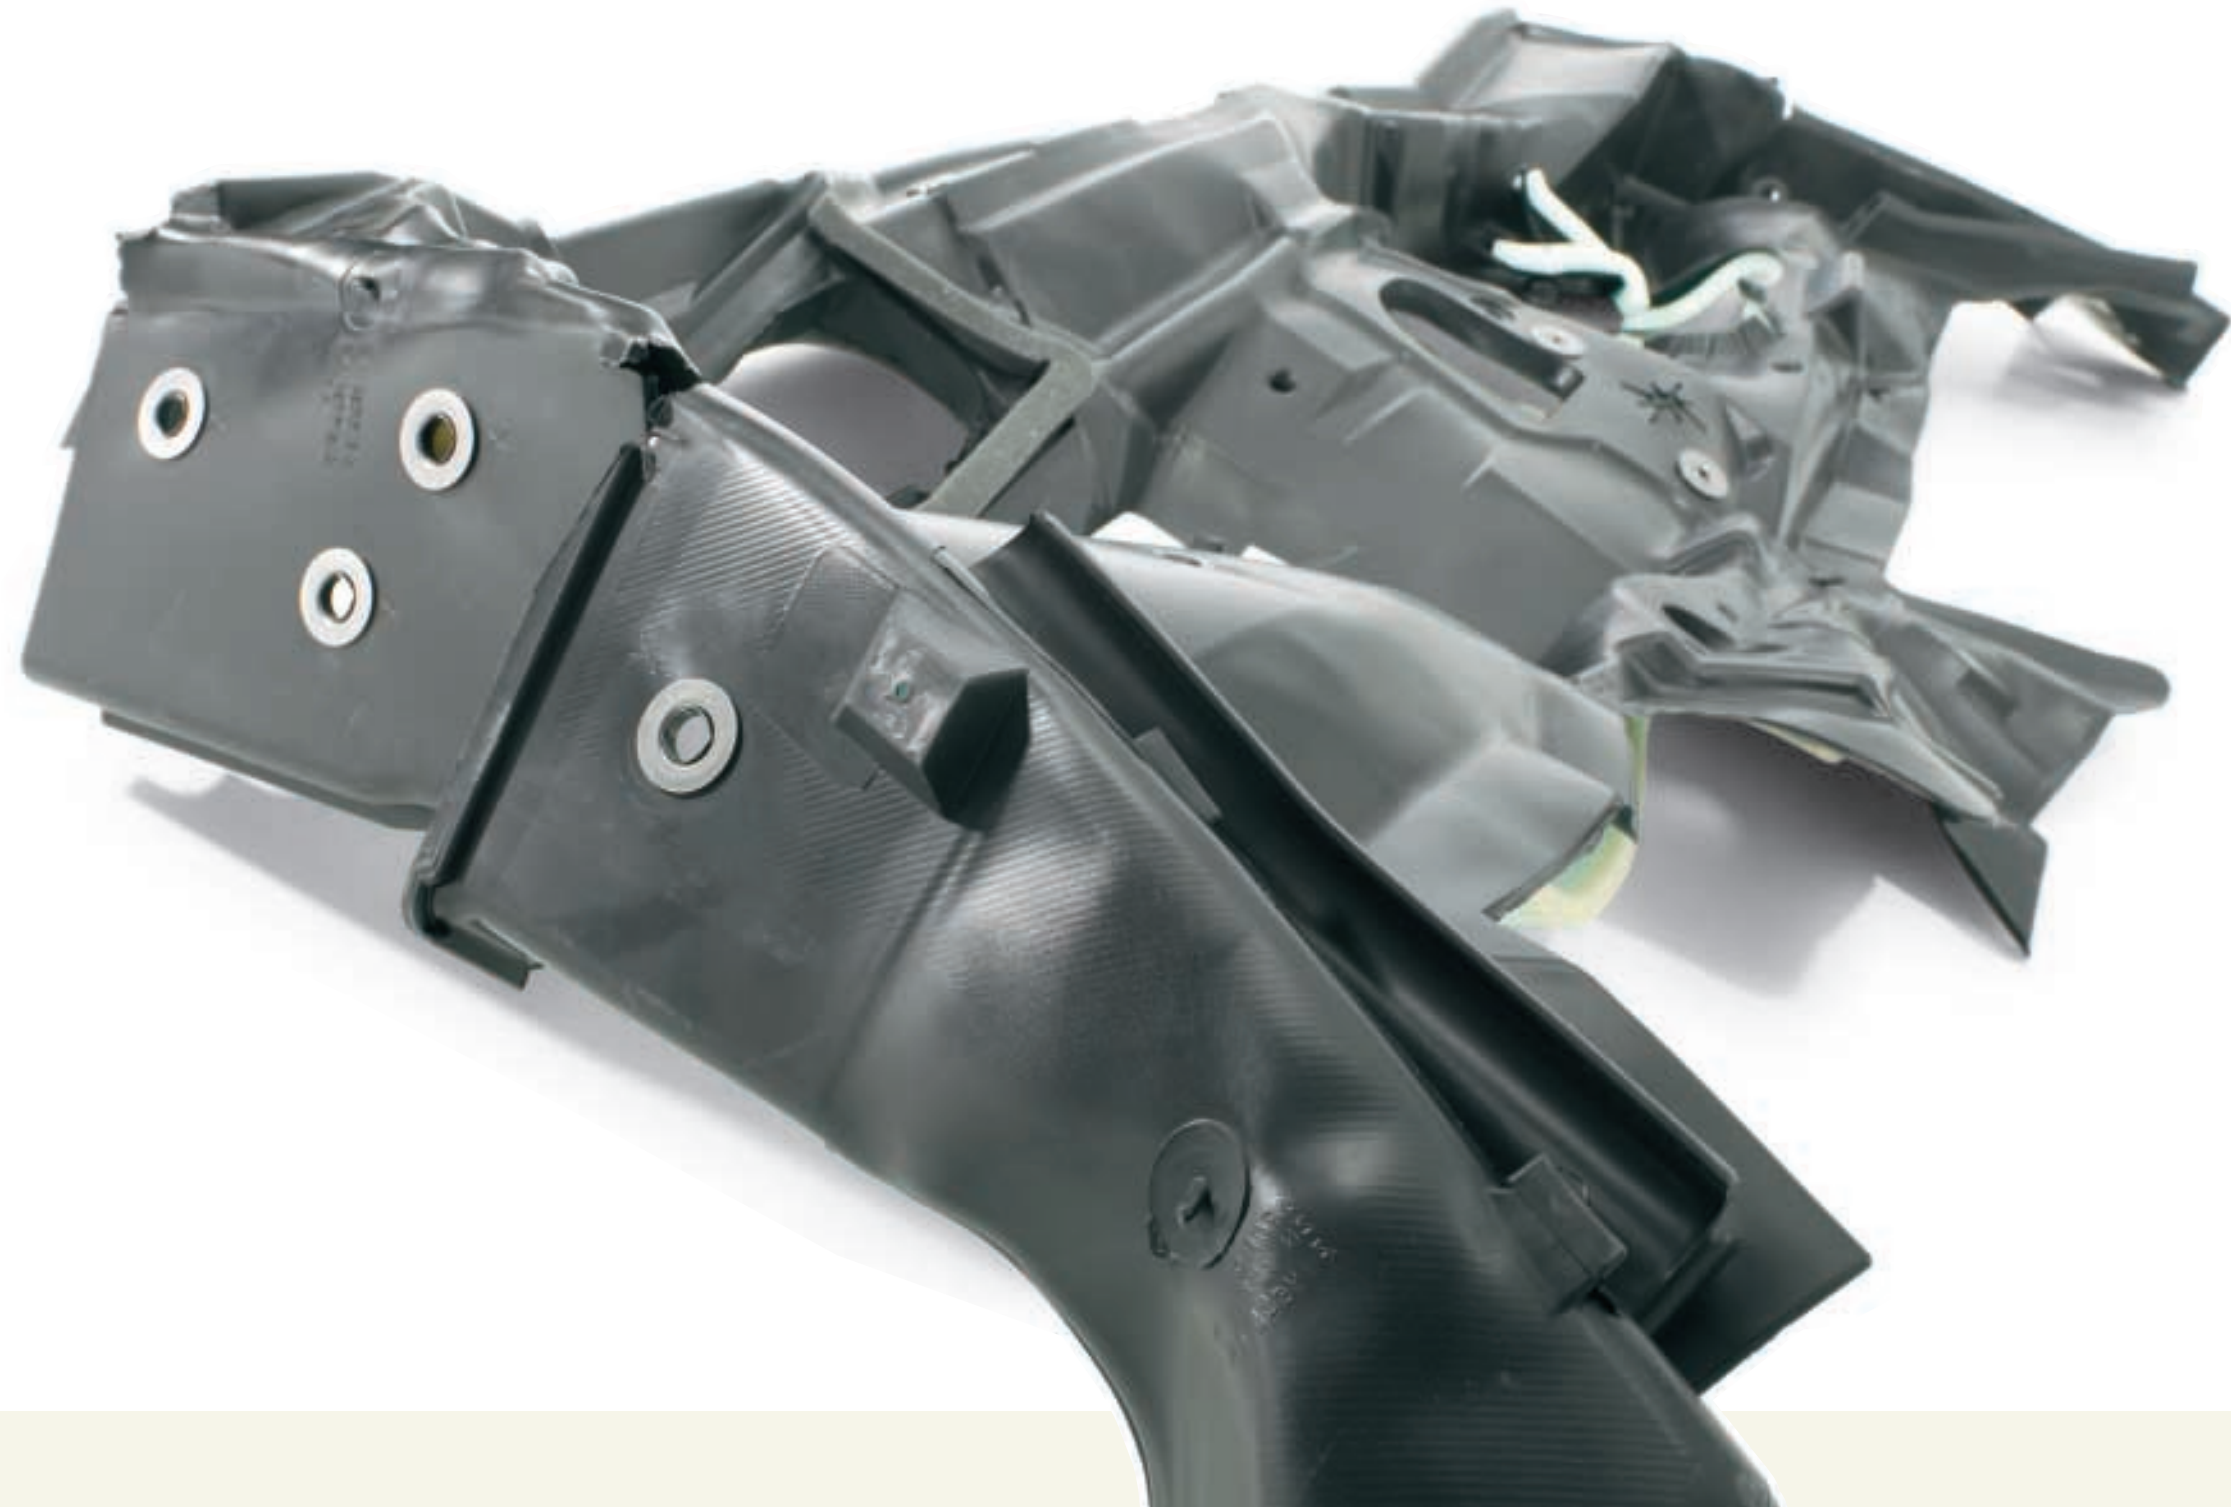

Innovation is more than a concept at Cascade Engineering. It is the reason we do what we do, and the fuel for our passion to make dreams come true. Whether it's developing a new material, solving a challenge once thought impossible or creating careers, we offer the most important thing a company can make — the promise of a better tomorrow. We invite you to learn more about Cascade Engineering and our vision, and to continue to bring tomorrow closer.

We look at the world through creative eyes. Our material science is a competitive edge and a fundamental building block and integral to each and every project. Paired with engineering teams offering product and concept development and process engineering, our innovative excellence creates proven masterpieces in plastics.

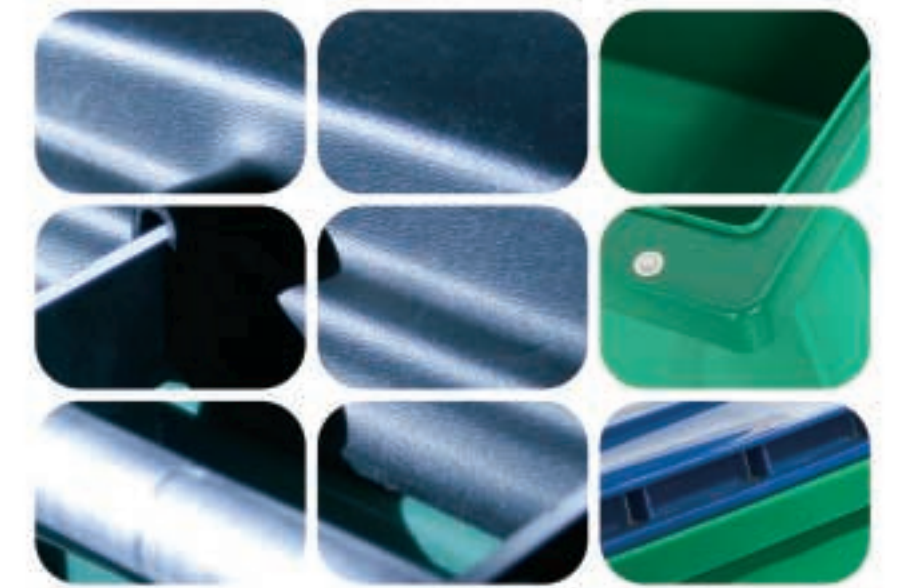

TO MORROW

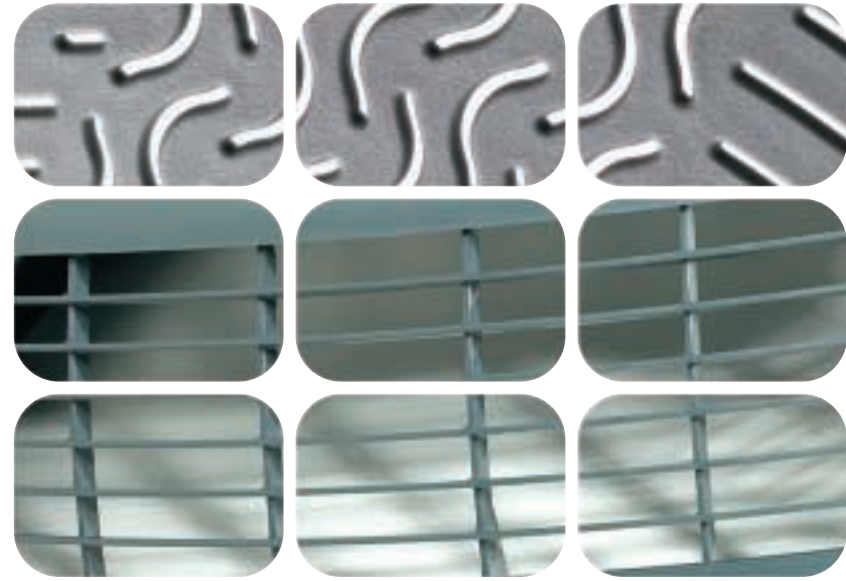

From an all-plastic car to acoustics, interior and exterior trim, chassis and powertrain and beyond, we provide the most innovative solutions for the complex challenges you face every day. We accomplish this through creating technological advancements and strong personal relationships. It is our commitment to bring a better future one step closer.

HOT

Perfection in plastics. Customer-centered solutions. Complete cart management systems. These service solutions are the most intuitive, aesthetic product offerings available anywhere. In addition, our proven applications, such as in-mold graphics and asset management, go beyond what is required to continually shape the future of the solid waste industry to ensure customer satisfaction.

CATBIRD SEAT

The participation in the development of breakthrough products for global companies defines Cascade Engineering as a true innovator. In consistently developing solutions that have resulted, for example, in the most innovative seating products in the world. And doing so faster than expected, we've gained a reputation that stretches internationally. We answer questions and we provide solid solutions to the most complex challenges while continually shaping ideas in plastics.
