Your single source
for pallet and container solutions

DECADE PRODUCTS®

Decade pallets and containers are

Decade Products manufactures a complete line of plastic containers and pallets for industrial, agricultural and food processing applications worldwide. Our products offer a unique level of quality, performance and cost-effective advantages unlike any other containers and pallets on the market. Engineered from high-density polyethylene (HDPE) structural foam, these strong, yet lightweight, completely reusable containers and pallets offer increased life span, superior corrosion resistance, and virtually no maintenance.

MACX® Shipping and Storage Containers

MACX containers are built to meet the most rigorous demands in industrial, food processing and agricultural applications. These all plastic, fixed wall containers are rugged and recyclable. MACX containers meet USDA/HACCP standards for food handling, and can be steam cleaned. Extremely temperature resistant and stackable to 10 high.

Specifications

External Dimensions	48" x 40" x 31"
Internal Dimensions	45" x 36.75" x 25.75"
Maximum Load Capacity	1,500 lbs.
Tare Weight	89 lbs.
Maximum Stacking Load	14,000 lbs.
Volume Capacity	190 U.S. gallons 20.4 bushels 25.4 cubic feet

Decade Custom Containers

Whether you need special size containers to work with your current material handling and shelving system, or containers to fit your lift trucks, rotators or product size, Decade can provide you with a custom-made container that precisely matches your requirements. And, when you need more than just a different size, we can add features such as doors, casters, drain plugs, label holders, and attachable lids.

Don't change your system—get the truly customized product you need from Decade.

engineered to increase your efficiency and profitability

KitBin® Shipping and Storage Containers

Rigorous performance in a modular design. Interchangeable sidewall panels completely detach from the pallet for easy storage, reduced shipping costs, lower repair/replacement and inventory costs. Four disassembled containers fit into one KitBin unit with the pallet bases nested on top. Saves up to 75 percent of trailer and storage space compared to solid wall containers.

KitBin features smooth surfaces for easy cleaning and product protection—no splinters, rust or paint chips to contaminate products. Meets USDA standards for direct food contact in agricultural and food processing applications. Select from solid wall and vented wall styles. Four-way forklift entry, stackable up to 6 units high.

KitBin XT Extended Height Containers

The new KitBin XT bulk container combines all of the features of the standard KitBin container, plus a unique ergonomic design with removable top sidewall panels to help you avoid back strain and pulled muscles. This container handles approximately 70 percent more weight and volume than the standard KitBin unit for increased versatility and greater savings. The KitBin XT container features specially modified panels and stabilizing clips that let you join a second layer of walls together to make a "two-story" container.

Refined locking mechanism requires no special tools and operates "outside the box," eliminating the need to reach inside the container.

Specifications

	KitBin Container	KitBin XT Container
External Dimensions	48" x 40" x 28"	48" x 40" x 50.5"
Internal Dimensions	44" x 36" x 23"	44" x 36" x 44.5"
Maximum Load Capacity	1,320 lbs.	2,200 lbs.
Tare Weight	84 lbs.	123 lbs.
Maximum Stacking Load	6,600 lbs.	6,600 lbs.
Volume Capacity	163 U.S. gallons 18 bushels 20 cubic feet	317 U.S. gallons 34 bushels 42.4 cubic feet

KitBin ErgoNizer Your Distribution Center Solution

ErgoNizer system is specially engineered to help you improve safety and lower the cost of your pick and pull operations. For maximum application flexibility, ErgoNizer systems let you use the pallet by itself, or with detachable

sidewalls that make up the standard KitBin system. When filling orders, three walls of the container can be secured in place on the anti-slip pallet for easy access and improved ergonomics. When the order is completed, simply attach the fourth sidewall and secure with the KitBin lid for direct shipping.

Pallet base features a reinforced center leg with integral rubber anti-slip inserts to increase holding power and minimize slippage.

A Pallet for Every Purpose

Decade offers a full range of pallets for industrial, agricultural and food processing applications worldwide. Engineered of high-density polyethylene (HDPE), Decade pallets are strong yet lightweight, corrosion resistant and durable. Because they are completely reusable and virtually maintenance-free, Decade pallets are more cost-effective and user-friendly than pallets manufactured from wood, cardboard, and metal.

From heavy-duty pallets for industrial use, to FDA-approved pallets for food applications, to "one-way" pallets for export use, you will discover that our products offer a unique level of performance, quality and cost-effective advantages unlike any other pallets on the market.

NEW!

RACX™ Picture Frame Pallet Premium Performance at an Affordable Price

Decade's new RACX™ pallet combines strength and economy in a lightweight one-piece design for superior performance at an affordable price. Fabricated of recycled HDPE plastics, these rackable pallets feature a picture frame bottom with runners on all four sides for stability. They are ideal for use in warehouse racking systems, as well as stack loading, closed loop transport, floor storage and automated material handling applications.

RACX™ Specifications

Dimensions (inches)	48 x 40
Height (inches)	6.1
Weight (lbs.)	34
Truckload Quantity	540
Dynamic Load (lbs.)	5,000
Static Load (lbs.)	25,000
Racking Load (lbs.)	2,200
Grommets	Optional
Lip	Optional

Pallet Buy-Back Program

Since Decade pallets are made of 100 percent recyclable material, we will buy back and recycle your non-serviceable pallets in truckload quantities. The buy-back program not only offers environmental benefits, but also lowers your initial purchase cost.
