

Verify

Trust but verify, the saying goes. Most refuse companies lose out on revenue, and in turn profits, because of inaccurate or outdated information. Verify from Cascade Engineering uses technology to conduct an audit of your service area and gives you a clean database, so you can recover lost revenue and find new revenue. And once we're done, you can better manage your business.

So whether you are managing a large community or small, urban or suburban, our process will save you time, make you more efficient and lead to greater profitability.

Capture Lost Revenue

Verify audits conducted to date have recovered between three and eight percent of missing revenue. By collecting data electronically along your routes, we generate more accurate information that can be used to:

- Provide complete addresses
- Update incorrect addresses
- Determine the number of living units in multi-family buildings
- Record dwelling type for accurate billing

With Verify, you can clean up your existing database, helping you recover lost revenue and generate additional revenue. And once we're done, you'll have clean data that's easy to maintain, so you can better manage your business and be more profitable.

Contact us to learn more about how Verify can help you collect more than refuse.

Find New Revenue

New homes and neighborhoods are being built all the time. Through our proprietary process, Verify from Cascade Engineering will help you locate new construction sites and new homes.

You'll capture new revenue quickly through:

- Identification of new construction sites
- List of unbilled customers
- Discovery of new homes

MULTI-FAMILY

Clean Your Database

Verify will examine your customer database, searching for duplicates, incorrect zip codes, variations in street names and more. Once our audit is conducted, we'll clean up your database so you can upload it directly to your system with accurate and timely information that will help you run your business better.

- Record vacant lots
- Clean up street name variations
- Remove duplicate entries

Verify is a component of EcoNology; it helps you recover lost revenue and generate additional revenue through a detailed audit of your service area.

EcoNology is a portfolio of eco-friendly, technologically advanced products and services from Cascade Engineering. EcoNology helps improve solid waste collection efficiency, preserve natural resources and maximize landfill diversion.

By providing an integrated scale system (NTEP certified) with an embedded radio

frequency identification (RFID) chip in each cart, Cascade Engineering helps you manage your cart base, improve operational efficiency, conduct pick up verification, and weigh solid waste and recycling amounts at every pick up.
